

SP706 FAQ

Sipex Part: SP706

Date: Jul 24-07

Question:

I 'm cloning an electronic board with an SP706TEU supervisor circuit but il don't need the pfi and the watchdog capability, I only use the reset function. Is there a Sipex equivalent part with only three pins VDD GND /RESET?

Answer:

Unfortunately, we haven't such part...

Question:

Does Sipex have a cross for ... [typical requests such as Supervisor Circuit DS1706TEUA] ?

Answer:

Sipex has a cross reference lookup on its website available at:

<http://www.sipex.com/search.aspx?caller=crossRef%20advSearch%20siteSearch&title=crossRef>

Enter the part number you're trying to cross, and if there is a match, the CrossReference database will output any hits. In this case, the SP706TEU is a Pinout Equivalent device.
